Drawing will be more fun when you're using a pen. What's the difference? You may be wondering, why is it better to use a pen when drawing rather than a mouse. The answer is simple: when using a mouse, you have to move your hand over the surface, which is a lot of effort. On the other hand, when drawing with a pen, you simply have to move it over the surface, like you're writing on a piece of paper. This means that you can focus on your art and you don't need to worry about accidentally hitting the mouse. You can draw just about anything. When you create an art with Sumo Paint, you'll find that you have the freedom to draw anything you want. When you start drawing, you'll be asked to pick your canvas, a pen, brush, the number of colors and much more. You'll also have the option of drawing, in a freehand way or choose from one of the options available, such as rectangles or other patterns. Once you've done your drawing, you'll also have the option of sharing it to a gallery, or adding it as a bookmark in your browser. This extension is available in six languages.
